## OBJECTIVE

Seeking a software development/consulting position in the software industry.

## EDUCATION

The Pennsylvania State University, University Park, PA

Bachelor of Science, *Computer Engineering*, May 2018 GPA: 3.29

- Selected for the Dean's list of the first, second, fourth, seventh and eighth semester.

## WORK EXPERIENCE

**MICROSOFT**, Beirut, *Account Technology Strategist Intern* July – August 2017

- Participated in executive meetings to establish **technology road maps for customers**.
- Participated in partner meetings to **understand customer needs and provide a solution**.
- Performed **presentations to manager about new technologies** that increase work efficiency.
- Assisted in creating internal workshops covering Microsoft technologies and strategies.

**CARDIODIAGNOSTICS**, Beirut, *Software Developer DX Intern* July – August 2016

- Trained on **Azure** cloud services and **MVC** web applications in Microsoft with the developer experience team and was sent to Cardiodiagnostics to assist in the migration to Azure cloud.
- Created a **business analytics website** (full stack) that handles large amounts of data extracted from SQL server and presents it in a smart manner using **MVC ASP.NET**, Entity Framework, JQuery, **JavaScript**, AJAX, CSS, HTML, C#.
- Managed source code using Visual Studio Online source control.
- Published, presented and demoed the project in front of **company leads**.

**PENN STATE CHEMISTRY DEPARTMENT**, University Park, *EBook Programmer* February - July 2016

- Worked on a kinetic theory widget to simulate particle collisions using JS, HTML and CSS.
- Learned how to use **Gitlab** and **Gitbash** for source control.

**BORN INTERACTIVE**, Beirut, *Windows Phone DX Intern* July – August 2015

- Trained on Windows Universal apps, C# and XAML in Microsoft with the developer experience team and was sent to **Born Interactive** to implement a windows phone app prototype.
- Data handling consists in retrieving **JSON** from **RESTful API** using **GET, POST and LINQ methods**, saving it in local files and displaying it in listview data templates.
- Used **Geolocation** to determine distance to certain locations and filter search results.
- Created a **local database** for storage of personal info using **SQLite**.

## ACHIEVEMENTS

- **2<sup>nd</sup> place** in CodePSU 2016 programming competition Intermediate tier.
- **3<sup>rd</sup> place** in HackPSU Spring 2017 hackathon in the EdTech challenge.
- **Created website from scratch** using **Angular 6** and **typescript**. [github.com/gornad/PersonalWebsite](https://github.com/gornad/PersonalWebsite).
- **Created a sleep tracking app in HackPSU Spring 2018 for the GSK challenge**, which is an app designed to record and analyze meaningful sleep data. It uses the microphone to detect snoring and movement. It also measures and displays temperature and light values. [devpost.com/gornad96](https://devpost.com/gornad96).
- **Lockheed Martin Best Design 2<sup>nd</sup> place** for **Highwood USA** photogrammetry **capstone project**.

## RELEVANT KNOWLEDGE

- Proficient speaker and writer in English, French and Arabic.
- Programming: **Advanced C, C++**; Intermediate C# (ASP.NET); Basic Java (Android), JavaScript, Typescript (Angular), HTML, CSS, SQL, XAML, JQuery, AJAX, Keras, Xamarin, Unreal Engine 4.
